Angular Developer with experience in building public-facing websites

Job Description

[Apply Now](#)

We are looking for a high-quality Angular Developer with strong fundamentals and hands-on experience in public facing websites. The candidate will work on scalable, performance-critical Angular applications with ownership mindset.

Experience

2+ years in relevant field

Location

Hyderabad (Work from Office)

Role

Angular Developer with experience in building public-facing websites

Industry Type

IT Services & Consulting

Department

IT

Employment Type

Full Time, Permanent

Education

Any Graduate

Mandatory Skill Requirements

- Strong hands-on experience in Angular (core concepts) and Angular SSR
- Good understanding of public facing website architecture
- Practical knowledge of page speed optimization tools (Lighthouse, PageSpeed Insights, etc.)
- Working knowledge of SEO fundamentals (technical SEO is a plus)
- Strong grasp of website core concepts (performance, security, scalability)

Technical & Analytical Skills

- Quick in understanding logic, functionality, and existing codebases
- Strong problem-solving mindset; enjoys puzzles and analytical challenges
- Ability to identify issues quickly, debug efficiently, and resolve independently
- Basic backend debugging knowledge (API understanding, logs, error tracing)

Behavioral Expectations

- Crisp in understanding requirements and asking the right questions
- Highly responsible, focused, and dependable

- Comfortable working in a fast-paced, delivery-oriented environment
